## Our Mission

Blacks In Government (BIG) is a national, nonprofit 501(c)(3) organization dedicated to advocacy and career development training with members in all 50 states and abroad. Since its creation in 1975, BIG has focused its efforts on creating a level playing field in the government so that ALL government employees have an EQUAL opportunity to succeed and are equipped with the tools they need to grow and develop.

## Our Impact

Over the years, BIG's advocacy has extended from Capitol Hill to the White House with testimonies before Congress and round table discussions with American Presidents. One of BIG's greatest accomplishments was its contributions to passage of the NO FEAR Act.

## BIG Overview

BIG has been recognized for excellence around the world. We are an advocacy & training organization consisting of Federal, State and Local Government employees to include military, civilian personnel, and contractors. BIG is made up of eleven regions across the United States of America to include Alaska, Puerto Rico, and Hawaii.

Under the National Organization of BIG, the Board of Directors (BoD) writes the policy that governs the BIG Organization and the National Executive Committee (NEC), executes those policies, and implements daily actions that keep the organization operating effectively.

Regional Council Presidents preside over the eleven regions, consisting of 150 chapters, and nearly 10,000 members

Our members are subject matter experts, mentors and mentees, provided with opportunities for development and growth, and a support system like no other.

Our members have the opportunity and ability to maximize their careers, find a mentor, gain leadership development, enhance presentation and communication skills, learn to deal with diverse people, and provided the capability to come out of their comfort zones to become great.
